Introduction to PO Collaboration

DEFINITION

What is PO Collaboration?

An interface that allows suppliers to confirm or propose changes to prices, quantities, and delivery dates directly in Coupa, centralizing supplier communication for direct procurement. Direct procurement refers to the acquisition of essential goods that are critical to the company's operations or production processes.

TIMELINE

When is it Required?

Supplier confirmation is required once the purchase order is issued. A confirmation window can be configured, allowing suppliers a defined period to confirm the purchase order.

OBJECTIVE

Why are we delivering?

- **Real-time Visibility:** Instant insights into supply chain risks.
- **Operational Efficiency:** Eliminates manual chasing of suppliers.
- **Data Integrity:** Ensures Netsuite remains the single source of truth for direct spend.

Confirmation Parameters and Validation Logic

Direct-Spend Scope Only

- Limited to Netsuite-created purchase orders imported into Coupa for PO Collaboration suppliers.
- Non-Netsuite purchase orders are out of scope and will not require PO Collaboration.

EXTERNAL ORDER CONFIGURATION (GLOBAL)

Line-Level Confirmation

Suppliers interact with individual items. Controlled entirely by external integration logic, supplier-record defaults.

Strict 72-Hour SLA Window

Window for external PO lines. The workbench automatically flags confirmations as overdue once the deadline has passed.

Partial Confirmations

Suppliers can confirm or change selected lines while leaving others in a "Pending Confirmation" status.

SUPPLIER ACTION MATRIX

ALLOWED

Price Modifications

Suppliers are permitted to propose price changes to individual line-items.

✓ ALLOWED

Date & Quantity Changes

Suppliers are permitted to propose changes to individual line-item quantities and expected delivery dates.

— NOT APPLICABLE

Item Substitutions

Swapping core material numbers at the line level is not supported within this project scope.

High Level Process

Every step below applies to direct-spend POs created in Netsuite for in-scope PO Collaboration suppliers.

Confirmation Status

Confirmation Status	Definition
Pending Confirmation	The order is waiting for your confirmation. Please confirm.
Pending Buyer Review	Your confirmation is a change and requires buyer review.
Confirmed	Your confirmation was approved. No further action required.
Processing	Your Confirmed confirmation is waiting for synchronization with the customer's system. This interim status will change back to Confirmed once the process completes.
Overridden	Your confirmation was rejected. Please review the reason provided by the Buyer.
